Biophysical Society Annual Meeting

February 18-22, 2023

Anticipated Attendance 7,000

Group Description

Biophysics is the field that applies the theories and methods of physics to understand how biological systems work. This field is critical to the understanding of the mechanics of how the molecules of life are made, how different parts of a cell move and function, and how complex systems in our bodies—the brain, circulation, immune system, and others— work.

Attendee Profile

Scientists in the field of math, chemistry, physics, engineering, pharmacology, and materials sciences.

Room Block

Hotel	Room Block
Courtyard Downtown	45
Embassy Suites	100
Hard Rock	125
